

Strong Hand Hygiene Protocols Stop the Spread of Infection

Providing easy access to hand hygiene products directly impacts healthcare employee compliance with proper hand hygiene practices, resulting in a decrease in healthcare-related infection rates. Choosing and implementing the right soap and hand sanitizing system is your best way to maintain a safe and clean facility for your patients, visitors and employees.

Potential Issues:

- Lack of soap stations or empty soap dispensers decreases hand hygiene compliance. **Drivers of poor compliance:**
 - Time
 - Demanding workloads
 - Intensity of patient care
 - Improper dosage of product
 - Insufficient time spent washing
 - Improper placement of product
 - Inoperable or empty dispensers
- Possible patient and visitor hand hygiene related issues
- Cost of managing your own program in labor and inventory

GKhealthcare Hand Hygiene Solution:

The GKhealthcare Hand Hygiene System will help you meet essential hand hygiene protocols while providing a healthier environment for your patients, visitors and employees.

Results:

- Having well placed Purell® Advanced Instant Hand Sanitizer and Antibacterial soap increases hand hygiene compliance
- Limits the risk from HAIs*
- Increased facility safety
- Increases patient experience with regularly serviced and maintained soap dispensers
- A managed program means a small weekly fee eliminates your labor and inventory carrying costs

GKhealthcare Hand Hygiene System:

Our GKhealthcare Hand Hygiene System offers you the products and services to make compliance easy while positively impacting patient satisfaction.

- Purell® Advanced Instant Hand Sanitizer
- Antibacterial Soaps
- New Modern Dispensers

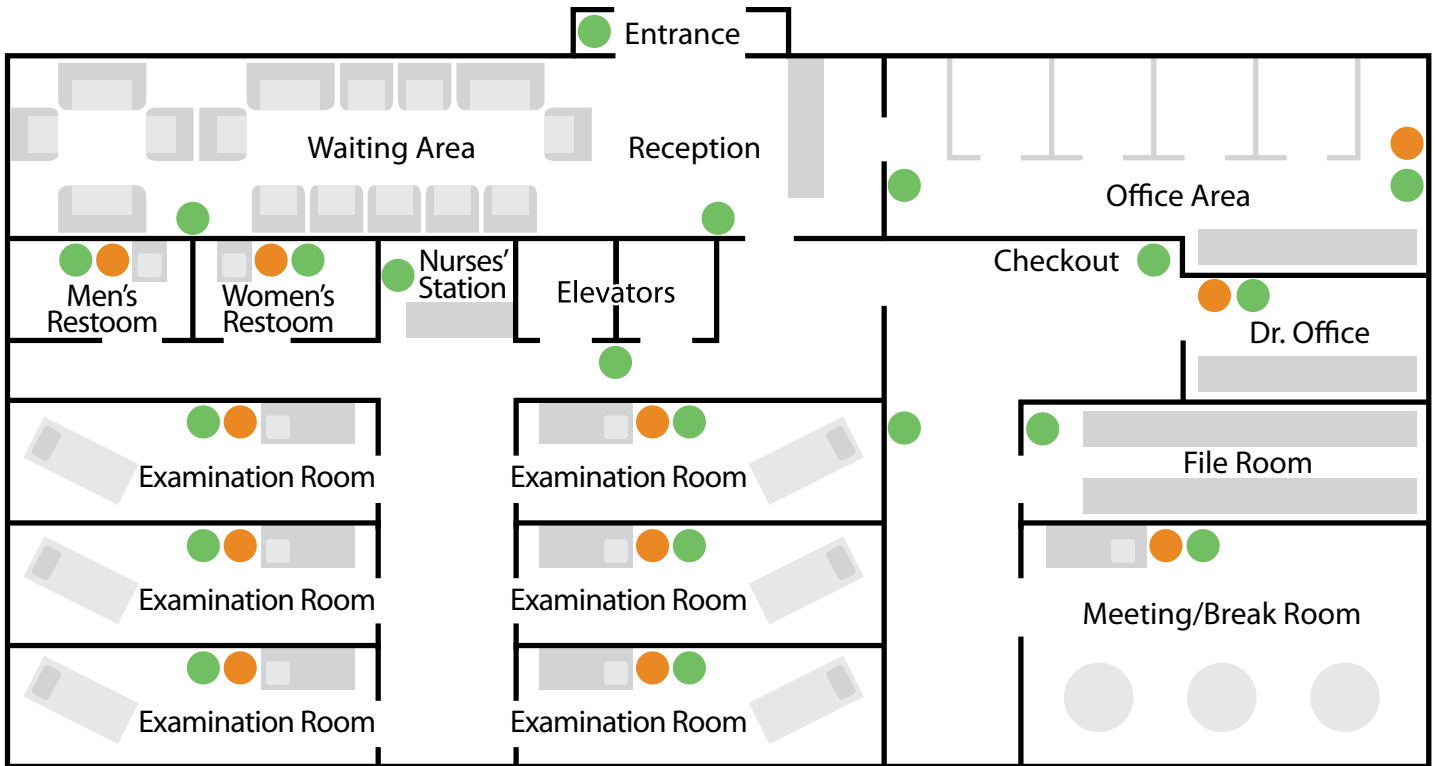

Program:

- Full line of preferred products and brands people will want to use
- Products installed in the right locations for your facility
- Soap dispenser servicing program tailored to meet your needs
- Ongoing inventory management
- Education programs to drive compliance

Contact your G&K representative to learn more about how a tailored solution can work for your facility.

*Healthcare Acquired Infections
